Objective

To secure a challenging management position with an established organization that offers the opportunity to utilize my expertise in operations and supply chain management.

Summary

Highly motivated, creative and versatile supply chain professional with eight years of experience in new technology acquisition, project management and metric development, as well as the ability to redesign processes that enable corporate efficiency. Especially skilled at financial modeling and analysis that drive organizational change. Excellent leadership, presentation, and capital management skills. Seeking a challenging management position in the supply chain field that offers excellent professional growth opportunities.

Selected Accomplishments

Supply Chain Management

- ♦ Managed transportation routing and GPS software to reduce private fleet costs by 1.7 MM over three years.
- ♦ Created an inventory analysis estimated to deliver 2MM dollars in savings from facility consolidations.
- ♦ Formulated a network model for container filling estimated to save 1MM by maximizing production at low cost filling points.
- ♦ Programmed forms and analysis spreadsheets to improve transition data collection in order to save one payroll hour per affected employee per day.
- ♦ Developed and executed a fleet technology transition plan for the divestiture of Nexeo Solutions, LLC from Ashland Inc.
- ♦ Modeled facility layouts to increase space utilization, improve workforce performance, and decrease equipment costs.
- ♦ Lead implementation of customer's supply chain management system, reducing order lead times from 13 to 8 days within one month of startup.
- ♦ Developed and presented multiple successful supply chain technology overviews, project proposals, and project plans to management that enabled process improvement, cost savings, and supply chain optimization projects to move forward.

Operations

- ♦ Responsible for the daily scheduling of 35 employees in a dedicated transportation operation.
- ♦ Created and conducted in-person and virtual training programs for new routing and GPS applications.
- ♦ Conducted on site review of multiple facilities to enable network capacity program.
- ♦ Launched review of Department of Transportation recordkeeping programs to reduce audit risk.
- ♦ Acquired and dispatched in-house dedicated and third party truckload and LTL freight.
