Background includes serving as the team lead for more than three full lifecycle implementations. Offers more than 25 years of industry experience in warehouse and inventory systems design, development, delivery, and integration. Key expertise encompasses:

Systems Integration Proposals • Enterprise Application Implementation • Business Case Development • Project Management •

Professional Synopsis

PACER GLOBAL LOGISTICS: Applications Consultant February 2008 to Present

- Team Lead - Planning – SAP Transportation Management (TM). Led a team of five to blueprint and Pilot the ramp-up SAP product for use at Pacer. Scope included intermodal movements, dray tendering, master data cleaning and conversion, and establishing routes and schedules.
- FI Team Member – Financial Supply Chain Management (FSCM) – Collections and Dispute Management. Assisted in the configuration and implementation of these modules.

ACCENTURE: Manager - SAP March 2006 to February 2008

- Served a number of clients materials troubleshooting and warehouse optimization with SAP.
- Warehouse Management Team lead for a major international construction wholesaler with responsibility for design of processes for Warehouse Management and integration of HighJump with SAP for over 4600 locations.

IBM BUSINESS CONSULTING SERVICES: Senior Consultant 2002 to 2005

- Led the GCSS-Army Supply Group in blueprinting processes in SAP, including producing process models using the ARIS process modeling tool and SAP's Solution Manager project documentation tool. Managed teams encompassing RFID, procurement, inventory and warehouse management, MRP and forecasting, distribution, environmental health and safety, master data conversion, and quality management; supervised 30+ consultants, Army personnel, and government-contracted subject matter experts.
- Served on the initial sales team for a \$400M+ project to deliver a SAP system for supply and maintenance to the US Army; involved in all aspects of proposal preparation, scope definition, project staffing, and project planning, and briefing Army leadership. During the project preparation phase, served as the supply team leader on the configuration team, directing eight consultants and client personnel through high-level gap analyses and detailed supply planning.

PRICEWATERHOUSECOOPERS: Senior Consultant 1995 to 2002

- Served on the proposal team that determined the cost and implementation strategy for the installation of SAP ERP for the US Navy's Crane Naval Surface Warfare Center. Led three consultants in defining scope, estimating the level of effort, determining costs, and proposing a project schedule.
- Recognized as the SAP material management subject matter expert and examined the costs and benefits of extending SAP from a pilot implementation to all operations for the US Navy's Space and Warfare Command.
- Managed three full lifecycle SAP warehouse management implementations for a private sector client with worldwide facilities. Designed, configured, and supported four global sites with SAP's warehouse management model and an additional two sites with SAP's inventory module and integrated them with other SAP models, such as quality management, financial, controlling, production planning, and sales/distribution.
- Part of the initial proposal team and spearheaded the integration of McHugh warehouse management software with SAP for Sony Corporation, earning Sony an internal award for best implementation.

BREault CONSULTING INTERNATIONAL: Principal 1994 to 1995

- Led efforts to automate an Ecuadorian food products distributor's warehouse and distribution processes. Educated the client in the development of warehouse automated software, delivered a system requirements document, and performed interim system design reviews. Single-handedly delivered all aspects of the proposal for this project.
- Directed a client team in reengineering their manual warehousing and distribution processes for automation for a food products distributor in the Dominican Republic; served on a two-man team that delivered the proposal for this work.

LITTON INDUSTRIAL AUTOMATION: Senior Applications Analyst 1986 to 1993

- Supported more than 100 proposal efforts for custom material handling and warehouse management applications, selling complex projects (\$1.5M to \$100M) to companies such as American Airlines, Calvin Klein Cosmetics, and Publix supermarkets.
